

Endotest Ordering – UOM & Carton Sizes

The Endotest products are manufactured and packed based on the
collection vessel insert size →

3 Sizes available – 8-14mm, 4-8mm and 1-4mm

Manufactured cartons contain 6 Collection Sets

Endoworx individually pack each customer order at the time the order is received. The carton pack off is dependent on the Endotest Microbiological sample kit required by the customers scope model.

Once an order is received cartons containing 6 of collection vessel size is opened and completed by collating the collection pot set with the correct scope accessory kit to make up the finished kit order code.

Each standard kit is made up of a collection pot, accessory kit including channel brush(s) and lab bag

All end users are advised and supplied a list at the time of introduction the codes they require to accommodate the testing on their scope models and if the transfer vessel code is required

“Orders must be in multiples of 6”

Orders for collection pot size 8-14mm being codes 727-**ET28xx**

4-8mm codes 727-**ET24xx**

1-4mm being codes 727-**ET21xx**

Endotest codes can be mixed to make up cartons of 6
